SECTION 2 – AUTHORITY, OVERVIEW AND SCOPE

2.1 Authority and Method

Agency is issuing this RFP pursuant to its authority under OAR 125-246-0170. This is an Intermediate Procurement. Agency will not be accepting protests.

2.2 Overview

Contractor agrees to provide an at-sea vessel, vessel operator, and one deckhand for 6-pack boats or 2 deckhands for larger vessels, and rod and reel fishing equipment to assist the Department in conducting hook-and-line fishing surveys. Surveys will entail multiple trips to and from Depoe Bay out to the Cascade Head Marine Reserve and associated comparison areas, located between Cascade Head Marine Reserve and Otter Rock Marine Reserve, within 3 nautical miles from shore.

Subject to the provisions of the contract resulting from this RFP (the “Contract”) shall become effective upon last date of signature by all parties thereto. Agency may seek authority to make one or more amendments (the “Anticipated Amendments”) to the Contract for the purpose of extending the term of the Contract and the maximum not-to-exceed compensation payable under the Contract or to modify the Services to be provided by the Contractor.

2.3 Scope of Work

Contractor agrees to provide an at-sea research platform (vessel) to perform hook-and-line fishing at various sites near Cascade Head Marine Reserve, in depths ranging from approximately 30-120 feet. The departure/return port for all operations is Depoe Bay, Oregon. Twelve (12) vessel days (day = approximately 8 hours/day) are estimated to be needed for hook-and-line surveys. Fishing effort will be split into two seasonal windows (spring and fall), taking place over six (6) days in spring (i.e., April-June), and six (6) days in fall (i.e., late August-October). Each 6-day effort will be compressed into as short a time-frame as possible, ideally consecutive days as allowable due to weather or logistics. Fishing will occur over hard bottom substrate at a variety of depths.

No fish encountered shall be retained for the purpose of consumption.

This contract extends from April 1, 2018 through December 31, 2018.

The days on which sampling shall take place shall be subject to joint determination by the Department and the Contractor within the following limitations:

- a. Cruise dates shall be set in advance for scheduling purposes, though can be modified as necessary to accommodate modifications such as weather shifts or angler availability.
- b. **Contractor shall identify in their bid the dates during the spring and fall sampling windows that the vessel will not be available for work due to other obligations** (halibut or other special seasons, scheduled maintenance, etc.)

The cruises will be terminated when, as determined by the Department, either:

- a. the scientific objectives of the cruises have been met, or the available funds have been exhausted, or when;

- b. due to equipment failure, inclement weather, lack of available fishing dates within the spring and fall sampling windows or other cause it appears that the scientific objectives cannot be met within a reasonable time frame, or when;
- c. the limit of twelve (12) total sampling days has been reached.

For the terms of this agreement, a full fishing day is defined as an 8-hour day, dock-to-dock. For the terms of this agreement, compensable time begins when the vessel leaves port to commence sampling operations, with all scientific and fisher crew and necessary equipment aboard, and ends upon returning to port. If during a cruise inclement weather, equipment failure or other developments make it impossible or unwise to continue fishing operations, the Contractor may elect to terminate the cruise and return to port. Alternatively, ODFW staff and the Contractor may jointly elect to suspend fishing operations and wait for conditions to improve. Time lost due to vessel equipment breakdown or time spent at the dock, such as waiting for the tide, or waiting to unload product or to load ice, fuel, vessel supplies or crew, is not compensable under this agreement.

Captain will ensure that the vessel is fishing in the prescribed 500m by 500m fishing cell selected by ODFW lead scientist aboard and is not outside the cell boundaries nor outside the marine reserve or comparison area being fished. Up to 6-7 cells will be fished in a single day. Within each of the cells, the captain will choose three discrete drifts to fish. Drifts may be repeated if necessary to achieve the three drifts of approximately 15 minutes each within a given cell. Captain will inform the scientific crew of the depth and drift speed at the beginning of each drift. Captain will give clear warning for anglers to prepare to make a drift, and indicate when to begin fishing once they have the boat in position. Captain will control drift speed to the extent possible, using a sea-anchor if the vessel is so equipped.

Crew members/deckhand responsibilities: Rig fishing rods with appropriate terminal gear as supplied by ODFW. If a volunteer brings their own rod, make sure it also is rigged with ODFW-supplied gear. When an angler hangs up, hand them a new rod and re-rig the one with broken-off gear. Refill fish-holding tote with seawater and wash buckets down when necessary. Help anglers de-hook fish and bring them to the measuring station. Handle all fish carefully and securely, no throwing fish. Notify scientific crew of floaters. If possible, retrieve with net. Assist with recompressing fish with descending devices. After survey work is finished, remove terminal gear from rods.

The Contractor hereby assumes full responsibility for the operation, repair, and maintenance of the boat and other equipment furnished by him/her. The Contractor agrees to provide all fuel and operating supplies and equipment. The Department shall not control the means or manner of the operation of the vessel except to specify sampling locations, but shall rely on the skills, knowledge and guidance of the Contractor.

The Contractor agrees to provide an Operator that has knowledge of:

- 1) Safe vessel operation,
- 2) Appropriate fishing gear and fishing locations
- 3) Weather and its effects.

Contractor agrees to provide certifications of all required insurance, mechanical inspections, operator license, US Coast Guard inspection and boater safety cards. The Contractor agrees to provide all fuel and operating supplies and equipment. The Contractor hereby assumes full responsibility for the operation, repair, and maintenance of the boat and other equipment furnished by him/her. The Department shall not control the means or manner of the operation of the vessel except to specify sampling locations, but shall rely on the skills, knowledge and guidance of the Contractor. The Contractor agrees to cooperate with the Department in collecting GPS location information at each sample site so that the Agency may return to each site later to repeat hook and line sampling in the same area.

"This data constitutes a trade secret under ORS 192.501(2) and shall not be disclosed except in accordance with the Oregon Public Records Law, ORS Chapter 92."

The Oregon Public Records Law exempts from disclosure only bona fide trade secrets, and the exemption from disclosure applies only "unless the public interest requires disclosure in the particular instance", ORS 192.501(2). Therefore, nondisclosure of documents or any portion of a document submitted as part of a Proposal may depend upon official or judicial determinations made pursuant to the Public Records Law.

Proposer is cautioned that cost information generally is not considered a trade secret under Oregon Public Records Law (ORS 192.410 Through 192.505) and identifying the Proposal, in whole, as exempt from disclosure is not acceptable, and may result in the rejection of the Proposal. Agency advises each Proposer to consult with its own legal counsel regarding disclosure issues.

If Proposer fails to identify the portions of the Proposal that Proposer claims are exempt from disclosure, Proposer has waived any future claim of non-disclosure of that information.

Phase 3: Ranking of Proposals

Phase 4: Interview(s), if necessary

Proposals received prior to Closing will be reviewed for Responsiveness to all RFP requirements including compliance with Minimum Requirements section and Proposal Content Requirements section. If the Proposal is unclear, the SPC may request clarification from Proposer. However, clarifications may not be used to rehabilitate a non-Responsive Proposal. If the SPC finds the Proposal non-Responsive, the Proposal may be rejected, however, Agency may waive mistakes in accordance with OAR 125-247-0470.

At any time prior to award, Agency may reject a Proposer found to be not responsive.

(Respond using Attachment 3 and 4 as indicated) Proposals will be scored according to how well the Proposer responds to each of the elements described in Section 3, Scored Proposal Components. Each member of the Evaluation Committee will evaluate the Scored Proposal Components of each Proposal. Points given by each evaluator will be summed and divided by the number of evaluators to compute an average performance score for each Proposal.

Responses may be typed and printed using a word-processing program, and then attached to the proposal. Provide full, direct, and substantive responses.

The ODFW will award to the Pricing Proposal with the lowest Estimated Total Price the maximum points possible. ODFW will award to Pricing Proposals with higher Estimated Total Prices a percentage of the maximum possible points available relative to the lowest Pricing Proposal Total Price.

ODFW will use the following formula for this purpose:

$$(L/X)*Y = A, \text{ where:}$$

- L = Lowest Estimated proposed Total Price/day scored
- Y = Maximum possible points
- A = Awarded points

Proposals not containing the following information may be considered non-responsive and be rejected by the Agency.

Estimated Fees (20 Points Possible)

The proposer must bid pursuant to requirements on Attachment 4 for the proposed services. Please state cost per 8-hour fishing day, additional insurance costs (if any), and additional cost for personnel/deck hands per day.

SAMPLE CONTRACT
EXHIBIT A
SCOPE OF WORK

Part I. General Information

The State of Oregon acting by and through the Department of Fish and Wildlife, is seeking a contractor to provide an at-sea vessel, vessel operator, and one deckhand for 6-pack boats or 2 deckhands for larger vessels, and rod and reel fishing equipment to assist the Department in conducting hook-and-line fishing surveys. Surveys will entail multiple trips to and from Depoe Bay out to the Cascade Head Marine Reserve and associated comparison areas, located between Cascade Head Marine Reserve and Otter Rock Marine Reserve, within 3 nautical miles from shore.

Part II. Description of work

Contractor agrees to provide an at-sea research platform (vessel) to perform hook-and-line fishing at various sites near Cascade Head Marine Reserve, in depths ranging from approximately 30-120 feet. The departure/return port for all operations is Depoe Bay, Oregon. Twelve (12) vessel days (day = approximately 8 hours/day) are estimated to be needed for hook-and-line surveys. Fishing effort will be split into two seasonal windows (spring and fall), taking place over six (6) days in spring (i.e., April-June), and six (6) days in fall (i.e., late August-October). Each 6-day effort will be compressed into as short a time-frame as possible, ideally consecutive days as allowable due to weather or logistics. Fishing will occur over hard bottom substrate at a variety of depths.

No fish encountered shall be retained for the purpose of consumption.

This contract extends from April 1, 2018 through December 31, 2018.

The days on which sampling shall take place shall be subject to joint determination by the Department and the Contractor within the following limitations:

Cruise dates shall be set in advance for scheduling purposes, though can be modified as necessary to accommodate modifications such as weather shifts or angler availability.

- c. Contractor shall identify in their bid the dates during the spring and fall sampling windows that the vessel will not be available for work due to other obligations (halibut or other special seasons, scheduled maintenance, etc.)
- d. The cruises will be terminated when, as determined by the Department, either:**
- e.**
- f. the scientific objectives of the cruises have been met, or the available funds have been exhausted, or when;**
- g.**
- h. due to equipment failure, inclement weather, lack of available fishing dates within the spring and fall sampling windows or other cause it appears that the scientific objectives cannot be met within a reasonable time frame, or when;**

the limit of twelve (12) total sampling days has been reached.

For the terms of this agreement, a full fishing day is defined as an 8-hour day, dock-to-dock. For the terms of this agreement, compensable time begins when the vessel leaves port to commence sampling operations, with all scientific and fisher crew and necessary equipment aboard, and ends upon returning to port. If during a cruise inclement weather, equipment failure or other developments make it impossible or unwise to continue fishing operations, the Contractor may elect to terminate the cruise and return to port. Alternatively, ODFW staff and the Contractor may jointly elect to suspend fishing operations and wait for conditions to improve. Time lost due to vessel equipment breakdown or time spent at the dock, such as waiting for the tide, or waiting to unload product or to load ice, fuel, vessel supplies or crew, is not compensable under this agreement.

Captain will ensure that the vessel is fishing in the prescribed 500m by 500m fishing cell selected by ODFW lead scientist aboard and is not outside the cell boundaries nor outside the marine reserve or comparison area being fished. Up to 6-7 cells will be fished in a single day. Within each of the cells, the captain will choose three discrete drifts to fish. Drifts may be repeated if necessary to achieve the three drifts of approximately 15 minutes each within a given cell. Captain will inform the scientific crew of the depth and drift speed at the beginning of each drift. Captain will give clear warning for anglers to prepare to make a drift, and indicate when to begin fishing once they have the boat in position. Captain will control drift speed to the extent possible, using a sea-anchor if the vessel is so

equipped.

d.

e. Crew members/deckhand responsibilities: Rig fishing rods with appropriate terminal gear as supplied by ODFW. If a volunteer brings their own rod, make sure it also is rigged with ODFW-supplied gear. When an angler hangs up, hand them a new rod and re-rig the one with broken-off gear. Refill fish-holding tote with seawater and wash buckets down when necessary. Help anglers de-hook fish and bring them to the measuring station. Handle all fish carefully and securely, no throwing fish. Notify scientific crew of floaters. If possible, retrieve with net. Assist with recompressing fish with descending devices. After survey work is finished, remove terminal gear from rods.

f. The Contractor hereby assumes full responsibility for the operation, repair, and maintenance of the boat and other equipment furnished by him/her. The Contractor agrees to provide all fuel and operating supplies and equipment. The Department shall not control the means or manner of the operation of the vessel except to specify sampling locations, but shall rely on the skills, knowledge and guidance of the Contractor.

The Contractor agrees to provide an Operator that has knowledge of:

g.

h. Safe vessel operation,

i. Appropriate fishing gear and fishing locations

j. Weather and its effects.

Contractor agrees to provide certifications of all required insurance, mechanical inspections, operator license, US Coast Guard inspection and boater safety cards. The Contractor agrees to provide all fuel and operating supplies and equipment. The Contractor hereby assumes full responsibility for the operation, repair, and maintenance of the boat and other equipment furnished by him/her. The Department shall not control the means or manner of the operation of the vessel except to specify sampling locations, but shall rely on the skills, knowledge and guidance of the Contractor. The Contractor agrees to cooperate with the Department in collecting GPS location information at each sample site so that the Agency may return to each site later to repeat hook and line sampling in the same area.
